

# LinxOffice™

With LinxOffice, your business will enjoy the benefits of a comprehensive office phone system, without the hardware and maintenance costs typically associated with a PBX system.

Whether your business is a one location “garage shop” with two employees, or you have more than three hundred employees in offices nationwide, it is your business. You want to build and project a professional image for all of your callers, whether they are calling for the first time or the hundredth time. They must be able to access the information, people or departments that they need, simply and seamlessly. In the past, this level of professionalism and efficiency could only be attained by purchasing expensive telecommunications equipment that required you to allocate resources to phone system management, rather than allowing you to focus on your business. Now, you have an affordable, powerful solution available on a subscription basis: LinxOffice™.

LinxOffice is a custom-tailored solution designed to meet your unique communications needs. With a robust Automated Attendant as its base, LinxOffice combines the features and functionality of a suite of Linx services to provide you with the power of a comprehensive phone system on a subscription basis. This powerful “virtual PBX” can be customized to meet your specific, unique communications needs without the hardware and maintenance costs typically associated with a PBX system. LinxOffice lets you spend your time maximizing your business’ profits rather than maintaining your phone system.

The LinxOffice Automated Attendant provides a customizable menu that directs calls to any number anywhere, plays recorded messages, and sends and receives faxes. LinxOffice also offers features typically found in expensive PBX systems, such as the ability for a caller to “zero out” to an operator, and a spell-by-name directory service. Linx services, such as LinxConnect™, can be integrated into your LinxOffice solution to provide you with sophisticated and seamless off-premise call transfer.

With LinxOffice, you can spend your time maximizing your business’ profits rather than maintaining your phone system. You won’t need to invest in complex telecommunications systems that will be quickly obsolete and outdated. LinxOffice accommodates your changing requirements as your business grows and your telecommunication needs evolve.

LinxOffice saves you time and money while providing you with the most advanced, customized solutions available on a subscription basis.

## With LinxOffice, you can:

- Customize the Automated Attendant
- Employ a “0” out to Operator option
- Route calls to any location, on- or off-site
- Integrate seamlessly with existing Centrex or PBX systems
- Fax back information to your callers
- Include a “Spell-By-Name” directory for easy name searches
- Set-up conference calls from any location
- Enjoy local and toll free access
- Use extension dialing, with internal messaging via extensions

Simplify. Connect. Communicate™ With LinxOffice.
